

Cemu - Bug #153

Steam overlay being injected successfully but ignoring hotkeys

Description			
The "Access Steam community while playing" popup appears, so does the FPS counter (if enabled), but the keys that should actually open the overlay or take screenshots do nothing. The game runs and renders normally. In earlier versions, or specifically 1.11.0 was the one I tried, screenshots can be taken just fine, and even the overlay can be opened without breaking most of the time.
