Description

In the new version of cemu, 1.15.12b, this game, ninja gaiden 3 razor edge, crashes everytime after i click the new game and chose my character, a black logo appears and then it stopps and crashes.

I tried with the GPU buff cache accuracy at Low, Medium, High, still the same on all of them
With the CPU mode in dual core recompiler.

And as an extra note, the game doesn't appear in the gamelist, not matter what i do.
