

Cemu - Bug #182

Fast Racing NEO crashes when using recent NVIDIA drivers

08/30/2019 07:56 AM - Mikemk

Status:	Resolved	Start date:	08/30/2019
Priority:	Normal		
Assignee:			
Category:	Compatibility		
API:	OpenGL	GPU Vendor/Model:	NVIDIA GTX 1070
Cemu Version:	1.15.2b		
Description			
Driver version 411.70 and newer crash when crossing the finish line or shortly thereafter (varies by exact driver version). Driver version 411.63 works correctly.			
Possibly related. Driver version 411.70 and earlier have significant graphical artifacts. driver version 416.16 and newer only have minor artifacts.			

History

#1 - 08/30/2019 07:58 AM - Mikemk

Notably the functional driver is older than the list of archived drivers on NVIDIA's website, so I'd say it's a significantly outdated driver.

#2 - 12/21/2019 10:22 AM - Mikemk

The crashing also occurs on CEMU 1.16.0b with the Vulkan renderer.

#3 - 03/25/2020 12:02 AM - Mikemk

Fixed on 1.17.4

#4 - 04/10/2021 04:38 PM - Serfrost

- Status changed from New to Resolved
