

Cemu - Bug #292

[Regression] starting with Cemu 1.17.4 "One Piece: Unlimited World Red" (AUNPAF) doesn't start/work anymore

03/22/2020 10:09 AM - Cemmer76

Status:	Closed	Start date:	03/22/2020
Priority:	Normal		
Assignee:			
Category:	Compatibility		
API:	OpenGL, Vulkan	GPU Vendor/Model:	AMD RX 570
Cemu Version:	1.17.4		
Description			
<p>The game "One Piece: Unlimited World Red" (AUNPAF) doesn't work anymore since Cemu version 1.17.4: you launch the game, and it get stuck forever at the emulator pre-loading game screenshot (but it doesn't crash), so in fact the game never really starts/loads.</p> <p>With this game, the last working version of Cemu is 1.17.3.</p> <p>I've attached the log of 1.17.3 (working) and 1.17.4 (not working), the only difference that I can see is the last line of 1.17.3 log that is missing in 1.17.4:</p> <p>[09:46:49] IOSU_ACT: using account default in first slot</p> <p>I'm not an expert but I guess that 1.17.3 can start user account, while for whatever reason 1.17.4 not (?)</p>			

History

#1 - 03/22/2020 11:14 AM - Cemmer76

Forgot to mention that I'm on Windows 10

#2 - 05/16/2020 12:01 PM - Cemmer76

This issue can be closed (fixed by 1.19.0)
tnx
