Description	
<p>This is a bug reproducible on every system. Reproduced on 7 different Windows 10 PCs, 3 fresh install Win 10 1909 machines and even using Virtual Box booting from a fresh install of Windows 10 1909 or 2004. So it's clear it's not a misconfigured OS installation issue or any other software conflict.</p> <p>IMPORTANT: You won't see a appcrash Windows requester popping-up but you'll easily find the crash under Windows Reliability Monitor: it's a silent background crash.</p> <p>All crashes have in common: Exception Code: c0000409 Data Exception: 0000000000000007</p> <p>e.g. Descrizione Percorso dell'applicazione che ha generato l'errore: E:\my-storage-files\Cemu\Cemu.exe</p> <p>Firma del problema Nome evento problema: BEX64 Nome applicazione: Cemu.exe Versione applicazione: 1.19.3.0 Timestamp applicazione: 5ee411fa Nome modulo con errori: Cemu.exe Versione modulo con errori: 1.19.3.0 Timestamp modulo con errori: 5ee411fa Offset eccezione: 00000000095cd79 Codice eccezione: c0000409 Dati eccezione: 0000000000000007 Versione SO: 10.0.19041.2.0.0.256.48 ID impostazioni locali: 1040 Informazioni aggiuntive 1: 0f63 Ulteriori informazioni 2: 0f631f5245e6abf958991015cc08e600 Ulteriori informazioni 3: 2a13 Ulteriori informazioni 4: 2a13c34f12f4b4dd53ad374b5a7f5a7b</p> <p>For a quick reproducible environment I've created this archive with ready settings file for auto-update on launch: https://1drv.ms/u/s!ApMUGr0cuN39geZdDtHbboQXTVuyVw?e=g88EEK Just extract the archive and run cemu.exe, complete the update and when you'll press "Restart" button it will silently crash (you'll notice animated circle cursor for 1 second in Windows). You'll find the crash also under Windows Reliability Monitor.</p> <p>Please, fix this annoying minor crash issue.</p>	

History

#1 - 01/17/2021 01:57 PM - hexaae

Fixed and unreproducible anymore (current 1.22.4). Windows 10 20H2
