Can you provide log.txt from Cemu folder and confirm that this issue still happens in Cemu 1.20.0 (or newer)?

This happens for me too. When I go to show my picture to the lady outside the windmill on windfall island (Linda i think she is called), it doesnt let me give her a picture, instead just opens the pictograph as normal. This is for a quest that rewards a piece of heart. I have also noticed that if you open the pictobox, go to gallery and click a on any photo the game will just crash.

For me when i click A it gives me an error code of 103-9999
