<b>Description</b>			
<p>Hello there, recently I tested Just Dance 2016, 2017 and 2018 on Cemu. I realized these games are working fine till their start screen where you press A and proceed to the next screen to select a controller. Just Dance 2019 is working fine while these games don't. It might be cause Ubisoft changed their file system and engine version for 2019.</p> <p>These 3 games gets stuck on a loop and loads forever. Some people said they are play-able if you import your saves from Wii U, I tried that and it did not work.</p> <p>It might be unrelated/irrelevant but Dolphin Emulator also had the same kind of issue. If you play Just Dance 2015-2016-2017-2019-2020 for the first time on Wii/Dolphin, it asks you to create a dancer card (user account) after the start screen to track and personalize your data. If you try to play them in Dolphin, it will get stuck after creating a dancer card and loop forever.</p> <p>Dolphin developers fixed this issue in the latest versions of Dolphin. You can take a look at their fix here <a href="https://bugs.dolphin-emu.org/issues/11910">https://bugs.dolphin-emu.org/issues/11910</a></p> <p>I know Wii and Wii U are completely different but I just wanted to state this here since it's the same kind of issue while Cemu loops on start screen and Dolphin loops on the screen after the start screen.</p> <p>I tried the demo versions of 2016-2017-2018 and they are surprisingly working completely FINE on Cemu. I don't understand why the full games don't work while the demos are functioning fine.</p> <p>I hope this will get a fix asap.</p>
