<b>Description</b> The previously used NFCs in the NFC tab only goes it 11 (yes, yes, Spinal Tap). Would it be possible to add a configuration, at least, to allow the user to set a custom size? This is likely a niche thing, but it's a bit annoying when you have a bunch that your cycling through and keep have to go into "Scan NFC tag from file".

We used to have this issue in the past, it was fixed by adding the ability to drag and drop NFC files into the cemu window to load them, so just open your amibo folder in windows and drag the files.
