

## Cemu - Bug #406

### Installing System Apps places them in "mlc01\usr\title" instead of "mlc01\sys\title"

08/26/2020 04:32 PM - chriztr

<b>Cemu Version:</b>	1.22.10		

#### Description

The subject says it all.

Base games installed through the title manager comes up twice in the title manager for whatever reason.

It doesn't make a difference if you go "File -> Install game, update or DLC" or "Tools -> Title Manger -> Install title"

Also, installing system apps from the console like the friend list or the internet browser doesnt show up in the game list in cemu.

I also noticed cemu places these in ".\MLC\_LOCATION\usr\title\" instead of in ".\MLC\_LOCATION\sys\title\" where you would expect it to be.

#### History

##### #1 - 09/03/2020 10:00 PM - Petergov

- Status changed from New to Accepted

##### #2 - 04/12/2021 12:16 AM - Serfrost

- Subject changed from Double listing of base games in title manager installed through cemu and system apps to Installing System Apps places them in "mlc01\usr\title" instead of "mlc01\sys\title"

- Status changed from Accepted to New

- Cemu Version set to 1.22.10

- Base games installed through the title manager comes up twice in the title manager for whatever reason.

Resolved with 1.21.1b

- Installing system apps doesnt show up in the game list in cemu

Confirmed to be expected behavior & intended, at least at this point. You need to either keep your Apps separate in their own folder for easy navigation (without installing them) or you need to add them to your Game List on a per-app basis. The reason for this was to prevent all apps in that directory from being read and then polluting your game list.

Perhaps they can add specific titleIDs to be recognized instead of the full directory. Best to make that a feature request though.

- I also noticed cemu places these in ".\MLC\_LOCATION\usr\title\" instead of in ".\MLC\_LOCATION\sys\title\" where you would expect it to be.

This is still true, thus I'll change this issue's title.
