

Cemu - Bug #545

Skylanders swap force portal issue

07/20/2021 06:30 PM - zoppy

Status:	New	Start date:	07/20/2021
Priority:	Normal		
Assignee:	Petergov		
Category:	Input		
API:	OpenGL, Vulkan	GPU Vendor/Model:	
Cemu Version:	1.24.0b		
Description			
<p>The portal is acting like the figure is being taken off constantly and sometimes when I put the figure on the portal is being showed up as a brand new figure with lvl 1 and when I want to take the figure off the portal it doesn't act like I'm taking the figure off the portal it's acting like the figure is still on the portal while it's not.</p> <p>I've been waiting for over 1 year and a half for this to be fixed(well I don't think that it matters that much) but I'd be really thankful if u could fix it cemu devs and I know that it takes hard work,but please!</p> <p>I'm begging u like this because it's literally unplayable.</p>

Some links: <https://youtu.be/jhlij5GyLN0> to see about the "figure being taken off" problem (well the problem persists way more sometimes) And for the "and sometimes when I put the figure on the portal is being showed up as a brand new figure with lvl 1 and when I want to take the figure off the portal it doesn't act like I'm taking the figure off the portal it's acting like the figure is still on the portal while it's not." -> <https://youtu.be/7K6xS-ADE2Y> u can read the comments of the second video bcs it has some details too

oh yeah and forgot to say that when this happens "and sometimes when I put the figure on the portal is being showed up as a brand new figure with lvl 1 and when I want to take the figure off the portal it doesn't act like I'm taking the figure off the portal it's acting like the figure is still on the portal while it's not." I'm unable to change the skylander (u probably have noticed from what I was trying to say but i felt like i should say this thing too)

Oh and ingame photos

And forgot to mention that the portal doesn't even light up properly it just jumps colors in a "bruta!" way.
