Cemu Version:			

Description

1.15.5c, Windows 10 x64, Nvidia GTX 1070

I'm having the exact same experience as reported by a different user here:
https://www.reddit.com/r/cemu/comments/bfqy98/help_yoshis_woolly_world_texture_issue/

The graphical artifact is identical as the screenshot on that post.
I'm attaching a copy of the screenshot here.

Downgrading to 1.15.3 solves it.

Not sure if it's related to http://bugs.cemu.info/issues/46.

History
