Description As cemu is mainly used with a controller (at least in my case), it would be great to have a controller key combination to allow to quickly close a game, without using the mouse or the keyboard. Example: Pressing ZL+ZR+Select+Start at the same time would close the game/close cemu. Eventually, the key combination could be configured based on the user preference. This feature would be great for people playing cemu games on the TV using some sort of remote play solution (like Steam Link, Parsec, etc.). This would allow for a controller-only experience on the TV, which would be great. Thank you!
