Description
Attempting to upload levels on Super Mario Maker causes a crash, tested on 1.14.3, 1.14.4, and 1.14.6. All other online functions work including the Course World and notifications. Log is attached.

History

#1 - 05/18/2019 02:00 PM - TolerableDruid6

Attempting to upload levels on Super Mario Maker causes a crash, tested on 1.14.3, 1.14.4, and 1.14.6. Steps to reproduce:

1. Create a course.
2. Save and upload it.
3. Clear the course as required by Mario Maker.
4. Enter the course name when it asks you to.
5. The "uploading course" screen will appear for a couple of seconds before Cemu crashes.

All other online functions work including the Course World and notifications. Log is attached.

This was determined to be a problem with my dump of the game (specifcally, a bad dump), and works correctly normally. Please close this.
