Cemu Version:	2.0.0		

Description

I'm using a Mac Os.

The game is very fluid but you arrive at the port where you can move, two things can happen.

Either it goes all black with some elements like white banners or the background of the gamepad comes out.

It's very annoying because it doesn't let you play and it doesn't happen if the configuration is correct.

I appreciate any help from you.
