Cemu Version:	
Description	
<p>I Learned about the compatibility improvements on this game on the recent updates so I decided to check it out...</p> <p>Everything works great, some minor glitches here and there but still very playable...hooked my wacom tablet, changed it to mouse mode, things are going great, and then I go to save lesson:</p> <p>The game can't save lesson data. I set the mlc path to mlc01, then i created another subfolder and tried that one. I also used admin privileges...still nothing.</p> <p>the previous images to this error are these:</p> <ol style="list-style-type: none">1. https://gyazo.com/fb1d2b36964ef60623a305edace22a4f2. https://gyazo.com/7674d1cbf3aa62d4f1c85f5cab4cf6253. https://gyazo.com/c7cc19e3d9a20f661328948fa1c4949b <p>And then this happens https://gyazo.com/f47f67a77b6e9230c049ce6626646351</p> <p>Also, the save data size seems to change each time I try to save the lesson (at one time it was a 2.32 mbs and then the next was 14.02 mbs).</p> <p>P.S: I set the priority to high since I consider not being able to save progress as a game-breaking bug.</p> <p>Thanks and Kind Regards.</p>
