Cemu - Feature requests #100

When enabling a GraphicPack, allow the Presets and Description to show.

Description

Simple really. As it stands we must click the graphicPack name -- a lot of questions arise when people do not know to click the name to see the extra options. If the other options were to show up whenever you toggle the pack on and off using the checkbox, it would probably help with this scenario. Of course, still allow clicking the name.
