| Cemu Version: | 1.15.9 | | |
| Description | | | |
| <p>hey guys, just to signal that i have the same bug with the latest version (1.17.1) than before (1.15.20 & 1.16 & 1.17.0), when i launch cemu, the soft doesn't launch, on 1.15.19 still no problem. It opens while a second in my task manager (only in "details" not in "process") and close automaticly and anything in log.txt file totally empty... Something has changed in 1.15.20 that is still not solved here. (of course tried to update auto and manual)</p> <p>I'm sorry if my english is bad</p> <p>my spec : i5 7600 / nvidia gt 1060 / 16 gb ddr4 and all my drivers and windows 10 (1909) up to date</p> <p>Tell me if you need smthng else :)</p> | | | |

History

#1 - 02/14/2020 12:45 PM - Karlfalsh

I only have basic knowledge, but it could be some windows security setting. When I first opened Cemu 1.17.1 my OS warned me about opening.

#2 - 02/20/2020 07:45 AM - Krako13

I've added the folder where cemu is located in exclusion but it doesn't change anything, thx for the idea.

#3 - 02/20/2020 08:11 AM - Krako13

Problem solved, that was a weird character in my "settings.xml" that cemu doesn't like

#4 - 02/20/2020 11:27 AM - Petergov

can you send me the faulty settings.xml which crashes cemu, or did you overwrite it already?

#5 - 04/11/2020 05:53 AM - Zalnor

- Status changed from New to Closed

Closing issue as it has been abandoned with no info as to the actual cause issue. New bug report can be made if it comes back up.
