

Cemu - Bug #319

Rumble not working (DS4)

04/22/2020 04:12 AM - batblz

Status:	Closed	Start date:	04/22/2020
Priority:	Normal		
Assignee:	Petergov		
Category:	Input		
API:		GPU Vendor/Model:	
Cemu Version:	1.18.1		
Description I tested in several games, but none work. In the control settings it works normally. I'm using DualShock 4 with DS4Windows (XInput). It seems that I am not the only one with this problem.

Rumble does indeed work on xinput controllers with wii u pro controller selected. The issue is with your DS4 controller, your drivers, or DS4Windows.

I use the last version of ryochan, drivers are up to date and the vibration works in windows games normally.
