

## Cemu - Bug #34

### GFX selection and settings.xml corruption when GFX pack folder is on a different partition (using a link)

04/05/2019 02:45 PM - Laf111

<b>Status:</b>	New	<b>Start date:</b>	04/05/2019
<b>Priority:</b>	Normal		
<b>Assignee:</b>			
<b>Category:</b>	General		
<b>API:</b>		<b>GPU Vendor/Model:</b>	
<b>Cemu Version:</b>			
<b>Description</b>			
when using a symbolic link for the GFX folder and when the target is installed on a different partition, GFX selection and settings.xml are corrupted (empty nodes for GraphicPacks in settings.xml)			
Surely due to relative path computation (work flawlessly if installed on the same partition)			
=> use full path for GFX instead of relative one in settings.xml when packs are located on a different drive
