I'll be respondig to this post every time cemu gets an update, the issue is stil present on Cemu 1.21.3, free cemu instalation, same test, same results, If you need the big crashdump archives for any of the updates, ask for it, I'll save all of them, I'll atach the small crash report

There is no reason to respond every cemu update, the devs have been aware of the games status for a long time now. We thank you for all the info you have provided and if any more is needed it will be asked for.
