Description			
Not sure if this is a bug, but I can't get online with SSB4, I get an error message. I'm on version 1.1.6 of the game. There's a version 1.1.7 but that just adds amiibo support, so idk if it's necessary. Mario Kart 8 works fine online. I attached my log and a screenshot of the error message.

It is necessary to be on the latest version. The log tells you this.
