Cemu Version:	1.27.0		
Description After updating to 1.27.0, Hyrule Warriors doesn't load when pressing A button on loading screen. When launching a new game, and skipping the first cutscene, and the loading screen finishes loading, a Press A prompt appears, when pressing it a sound effect is played and the music restarts, but the game doesn't load. Tested with WUA, Folder, with and without Updates, DLCs and Graphic Packs
