

Cemu - Bug #679

Oddworld (and possibly other titles) won't boot anymore since Cemu 1.26.2

04/20/2023 09:32 AM - Meurish

Status:	New	Start date:	04/20/2023
Priority:	Normal		
Assignee:			
Category:	Compatibility		
API:	OpenGL, Vulkan	GPU Vendor/Model:	Nvidia MX130
Cemu Version:	2.0-35		

Description

After Cemu version 1.26.2, Oddworld New 'n' Tasty (and possibly other titles) that were perfectly playable, now don't even start. After launching the title a black screen appears without even showing FPS, and a few seconds later Cemu crashes. Cemu 1.26.1 is the last version where this title was playable. By looking at the changelog of Cemu updates, the problem may be the new Software decoder for H264 videos that was added in Cemu 1.26.2

I will attach the game changelog tested on the latest Cemu version, the Cemu 2.0-35 by using Vulkan.
